Infrared Scan

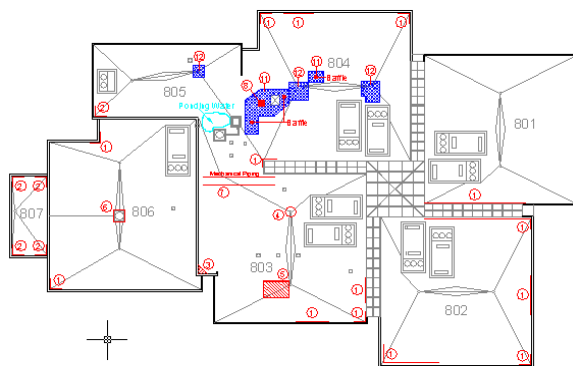

Low slope roof system scans:

- Non-destructive infrared scan locates trapped moisture
- Finds thermal variations due to wet insulation
- Locate roof deficiencies - stop further damage with quick detection technology

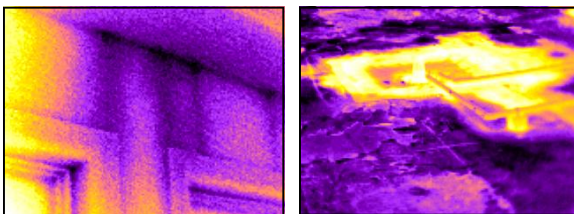

Up-to-date technology:

- FLIR ThermaCAM B2 infrared camera provides high resolution thermal imagery
- Delmhorst moisture meter; Model DP confirms moisture levels in roof insulation

Reporting options:

- Customized to fit owner's needs
- Scanned and digital images
- Descriptions of existing conditions
- Recommendations for repairs / replacement with budget estimates
- Detailed CAD drawings that outline roof details and wet areas
