April 6, 2009

To Whom It May Concern:

Holland Roofing has been working with Foresight Services and their roofing team for several years. Their design and consulting information has been invaluable. In 2008 Holland installed over 40 new roof systems for a single Foresight customer, these projects were all completed in a timely fashion due to Foresight's RFP Roofing Program. Foresight's project managers are great to work with on all facets of our associated roofing projects, thus resulting in professional results, satisfied building owners and tenants.

When we find out that Foresight is involved in a roofing project, we know that the owner will be satisfied with the end result!

Respectfully,

Curtis Sutton
